Conor,

I meant to include you on this message to Bhooma. More to come.

Hi Bhooma,

Here is part of a report written by REI, the state PECFA contractor. I had to cut it up into several

parts, and will send them to you and Conor. I will also add you to the user list for the epaosc.org website, where a number of reports are on the document list along with the 4DIM images which show the plume and soil source area based on the LIF and MiHPT work. For those, you will need to have the IT folks download the 4DIM viewer from the website.

I will add your names this afternoon. Please let me know if you have any problems accessing the information.

Hi Bob,

Could you please share the source characterization report for the Tower Standard LUST site?. Any other supporting information would also be helpful for us to contribute in a meaningful way.

Thanks.

Bhooma

Thank you, Bhooma. This is a good example to get me better acquainted with the process.

Hi Bob,

After reading Mike's email, I recognize the time sensitive nature of this project. I browsed through the web for a latest pilot workplan and I came up with this. The attached document would be a good start for you to put together a work order.

Thank you, Bhooma.

I will be working at home tomorrow. If you have a CD, can you e-mail the document to me?

If not, please place the report on my chair.

Thank you!

Bob,

I am working from home today and don't seem to have an electronic copy of AS/SVE work plan. I will bring the CD or the hardcopy with me when we meet tomorrow.

Subject: question about SOW for AS/SVE

Bhooma and Conor,

Thank you for offering to assist with the Tower Standard LUST site. I look forward to giving you some background site information.

As a first question, do either of you have a Statement of Work/Task Order/Work Plan for an Air

Sparge/Soil Vapor Extraction Pilot Scale Test at a site? Mike Harris wants us to move quickly to get a contractor on board to do this work at the site. I have access to a SF contractor but need an example SOW to draw information from for writing up my task order.

And secondly, are either of you a WAM or COR? I am a COR but we are looking for a backup if one is needed.

Thank you for your help.
